Fund Management

BT Investment Management Limited

Investment Objective

Aims to provide an overall return that exceeds the return from its benchmark, when measured over the recommended investment timeframe.

Investment Strategy

The Fund is actively managed and primarily invests in listed property-related investments including listed property trusts, developers and infrastructure investments, both directly and indirectly. The Fund invests primarily in Australia but at times it may have some overseas exposure.

Investment Performance

Progress of the Portfolio Investment

Fund performance

The fund outperformed the benchmark for the quarter ended December 2011. An overweight position in Centro Retail Australia and Charter Hall Group were our best contributors. On the negative side of the ledger, our underweight position in Commonwealth Office and Stockland were our largest detractors. The fund remains overweight in industrial and non-discretionary retail funded by underweights in discretionary retail and office. The sector is trading on an 11.6x price earnings (PE) ratio and a 6.7% distribution yield. Earnings growth for the 2012 year should be in the range of 2% to 3%.

Market Outlook

The Listed Property Trust (LPT) market remained relatively resilient through yet another difficult quarter. The sector was up 3.8% in the December 2011 quarter, with the broader share market up 2.1% over the same period. Over the 2011 calendar year the LPT sector outperformed equities for the first time since 2006. In December three listed retailers (JB Hi-Fi, Billabong and Kathmandu) announced profit downgrades highlighting weakness in general retail conditions. Ultimately this weakness should feed through to slower growth for the listed retail trusts. Reflecting these concerns, retail was the weakest subsector returning 1.6% over the quarter while the diversified trusts were up by 6.5%.
